Specifications

Type	Specification
Product	Air Purifier (With Humidifier)
Rated Voltage	220V~
Rated Frequency	50Hz/60Hz
Power	65W
Noise	≤66dB(A)
CADR (PM)	420m³/h
CADR (Formaldehyde)	68m³/h
Cover Area	29m² ~50m²
Main Material	ABS
Wind Speed	4 speeds
Product Dimension	403*245*603mm
Net weight	10.5kg
Gross weight	12.4kg
Power cord length Visible	1.8m
Sensor	Dust Sensor, Temperature & Humidity Sensor

Clean & Maintenance

Product Body Cleaning

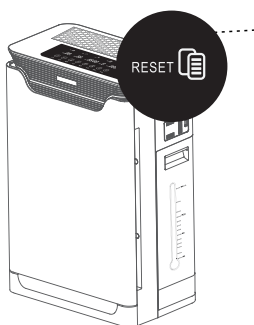

- Use a soft cloth to clean.
- Dirty cannot be easily clean can be wiped with a soft cloth dampened with a moderate amount of neutral detergent.

ATTENTION

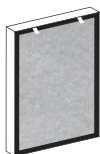

- Do not scratch the machine casing with a hard object during maintenance.
- When removing the front panel, please follow the instructions.

- After replacing the filter, press and hold "AUTO" + "TIMER" . When you hear the tone, "AUTO" and "TIMER" stop flashing, indicating the replacement time reset.
- Due to the different degree of pollution in the actual application environment, the applicable cycle of the filter will be different, which be judged by the sound and smell.
- Suggest clean every month, if the environment is poor, had better to increase the cleaning frequency.

- 1)When the surface area is dusty, it can be cleaned with a vacuum cleaner.
- 2)Surface dust to extend filter life.

Replacement cycle approximately 6-12 months.

Please note that the cycles of replacing the filter may different due to the different environments. Please think the used filter as non-combustible waste.

Problem & Reasons

Please confirm the following before repair when these occur.

Phenomenon	Possible reason & Solution
Machine not running on	<ol style="list-style-type: none"> 1. Is the power cord plug disconnected from the power outlet? → Reconnect power plug. 2. Is the front panel covered? → Re-cover the front panel. 3. Is the machine placed tilted? → Place it flat.
The air quality status indicator always Shows red quality and the PM 2.5 particles displaying numbers no changing for a long time.	<ol style="list-style-type: none"> 1.The sensor may be exposed to water vapor, soot, spray . → Move the machine to another clean environment to try 2. Remove the sensor door and wipe the sensor lens with a clean soft cloth.
Abnormal smells	<p>Check the filter if expired or release odor due to adsorption of contaminants.</p> <ol style="list-style-type: none"> 1. Clean the activated carbon filter and use it after drying.If it doesn't improve, please replace it with a new one.
Air particles are difficult to clear and noise becomes loud during operation	<p>Check if the HEPA filter is invalid?</p> <p>→ Use a vacuum cleaner to clean the HEPA filter and the primary filter. If the situation has not improved, please replace the new HEPA filter.</p>
Indoor air is polluted, but the air purifier does not respond	<p>The location where the machine is placed may be unreasonable and make machine not easy to absorb pollution.</p> <p>→ Change the placement of the machine, or select the manual mode and adjust the wind speed to "4".</p>

Upon completing the inspection, still can't solve, contact the dealer services if still not able to solve the problem
